## VIRTUAL SCIENCE CLUB

Dear Parents/Carers,

Just a reminder that Virtual Science Club is up and running. Your child is welcome to participate from home and to see what other year groups have been doing. Activities can be completed on any day, or at any time of day. Your child's teacher may suggest that your child participates as part of their science learning. There are activities to match National Curriculum science topics that are hands on and that will enrich pupils' engagement with science.

Google Classroom is being used as the digital platform for the club. If your child wants to participate, they will need to follow these steps:

- log in to their Google Classroom account
- go to classroom
- press the + symbol
- paste in this link **inur6nk**
- press join

They will be able to view posts from myself and other pupils. They may need to scroll down the page to find appropriate activities for their year group which will be signposted. If your child wants to add something, they can click on the 'announce something to your class' option where they will be able to upload what they do at home, whether it be written comments, pictures, videos or photos by clicking on the image of the paperclip. Remember, that whatever is uploaded will be seen by anyone else that has joined the club and therefore needs to be appropriate. **This is not an opportunity for pupils to send personal messages to each other.** I will be checking the posts regularly. In keeping with safeguarding guidelines, images of or videos of pupils **should not be shared** beyond the Google Classroom. Please do contact me if you require further information.

I look forward to seeing more of what the pupils are doing at home.

Yours sincerely,

Megan Begley
